MONEY SYSTEMS.

Range of Units of Value.

Twenty-six different monetary units are used by the forty-eight principal countries of the world. Thus Great Britain uses the sovereign or pound sterling. France and six other countries of Europe use a unit equal to the franc, and Canada and the United States use the dollar.

In value these different units range from 4.4 to 494.33 cents of money of the United States. They are represented in their turn by coins the values of which are either multiples or fractional parts of the value of their own chief units, and there are no doubt at least 200 such sufficient coins not one of which seems to have a value equal to that of any commonly known unit of weight, as the gram, for example, or the ounce of gold, although forty-three of these forty-eight countries have accepted gold as their standard measure of values.

This lack of logical relation of coins to any widely used unit of weight of the precious metals may be due to the fact that money systems seem to have grown up haphazard, under diverse conditions of life, in different parts of the world.

Such diversity in moneys may have been of little moment when millions of people spent their lives knowing nothing of the existence of other millions and there was little traffic. But these differences in monetary units are of importance now that international commerce includes millions of tons of products of the toil of all lands and billions of dollars each year to settle Its bills, for such differences put upon trade a wholly unnecessary tax. No pudently, turning to go. account is made here of the burden laid on domestic trade by like variation in the value of such units at home, as of the tael of China, which has six- less time than it takes to tell it, and teen different values within that empire.-Moody's Magazine.

"Old Hundred" Scares Birds. It is a strange but well authenticated fact that the wild creatures of the woods dislike the sound of that solemn hymn "Old Hundred." Mulr, the naturalist, proved the truth of this by ear tracks. singing it in the woods of the Sierras "I don't think the two incidents reto the birds and squirrels, which were quire any comment as to the difference very tame from never having been frightened by the report of a gun or town like Philadelphia."-Washington other alarming sound. They would Frisk, a beautiful coach dog and come and sit near him upon the branches of trees and listen to any lively tune he might sing, blinking their bright eyes as though they liked it, but at the first sound of "Old Hundred" they would beat a quick retreat ! to their holes or nests and never appear again until he changed the tune This experiment was made in different places on various occasions with exactly the same result.-New York Her-

When It Rains In India. . While Jupiter Pluvius reigns in India nothing can be done out of doors. The rafa at times is simply a white liquid sheet dropping strafght down from the heavens, so that no very great stretch of imagination is required to convince one that a deluge is not an Impossible event. Wide World Magazine.

Two Similar Incidents With Very Different Endings.

A CONTRAST IN METHODS.

One of the Experiences Was In New York and the Other in Philadelphia and the Outcome Left the Honors With the Latter City. "Recently I witnessed a couple of

dipping incidents that, it occurred to the friction of the air set the feathers me, illustrated a certain difference of on fire, and it swept on like a meteor spirit in two cities," observed a Wash. to disappear in the clouds. ingtonian who gets about a good bit.
